[Capital Asset Pricing Model CAPM](#)

December 7th, 2018 - Capital Asset Pricing Model CAPM is a model that describes the relationship between the expected return on an asset and its risk. It is based on the idea that the return on an asset is composed of a risk-free rate and a risk premium. The risk premium is the extra return that investors require to hold a risky asset instead of a risk-free asset. The risk premium is determined by the asset's beta, which is a measure of its sensitivity to the market return.
